Specialist Drainage Contractor – Cress Water Solutions

We are an animal welfare charity, with adoption centres throughout the United Kingdom. Some of these centres have self-contained sewage treatment systems, which treat and dispose of foul water on site.

It calls for a specialist contractor to deal with repairs and maintenance of these systems. We have been working closely with Cress Water Solutions for the last 8 years, to undertake this work. They have provided a very reliable and professional service in this time.

We have also used their services to design, construct and maintain 3 new vertical/horizontal combination reed bed systems. We are very happy with the service provided and the operation of these systems.

I can commend Cress Water Solutions to your organisation.

Richard Milton MCABEng
